Summary

Backend-focused software engineer with 4 years of experience building REST APIs, relational database schemas, and cloud-deployed Python services. Comfortable across the full stack, with a recent focus on FastAPI and SQLAlchemy.

Skills

Python, FastAPI, Flask, SQLAlchemy, PostgreSQL, SQLite, Docker, REST APIs, Git, pytest, pydantic, basic React

Experience

Backend Developer — Northwind Software Co. (2022 - Present)

- Designed and maintained REST APIs serving 50,000+ daily requests
- Migrated legacy raw-SQL data layer to SQLAlchemy ORM models
- Reduced average API response time by 30% through query optimization

Junior Software Engineer — Bright Path Systems (2020 - 2022)

- Built internal tooling in Python and Flask for the operations team
- Wrote automated test suites, increasing coverage from 40% to 85%

Education

B.Sc. Computer Science — University of Sample Town (2016 - 2020)
